Scavenger Photo Hunt

Scavenger Photo Hunt with mobile phone or camera

This scavenger hunt is not about bringing a lot of items back to school because that's not really environment friendly..

No, now we **make only pictures** of the items on page 2.

In each group of students, there will surely be one student who has a mobile phone for taking the pictures.

If not, one teacher/assistant could go with each group and use his/her mobile phone or camera for it.

One adult teacher or assistant should go with the group when they go around.

Make a photo of each item in the list of page 2 and return to your school.

Attention, teachers/assistant must check if the photos are made by the relevant mobile phone on the locations and not taken from the Internet.

Finally, check the documents and write the results on page 3.

Have fun with this Scavenger Photo Hunt.
